

Cover crops affect the mineral nutrition of cocoa trees in full-sun cultivation system

Jonas Olimpio de Lima Silva; Jaqueline Dalla Rosa*; João Carlos Medeiros; George Andrade Sodré; Paulo Cesar Lima Marrocos; Luiz Roberto Martins Pinto; Carlos Eduardo Pereira

Supplementary data I. Related to 2 and Table 1. Analysis of variance of dry mass and soil chemical attributes cultivated with cocoa trees in full sun system and intercropped with cover crops and uncovered soil, in the 0-20 cm layer, after two years of cultivation.
